

## Interface Contracts Ltd

### Occupational Health and Safety Strategy

Interface Contracts recognises that occupational health and safety is a cross disciplinary area concerned with protecting the safety, health and welfare of people engaged in work or employment. Our primary goal is to foster a safe and healthy working environment which forms a solid base for the secondary measures to take effect to protect fellow workers, family members, employers, customers, suppliers, nearby communities and members of the public who are impacted by the workplace environment as well as reducing medical care, sick leave and benefit costs.

Our main focus on Occupational Health and Safety is on three different objectives:-

1. The maintenance and promotion of employees health and working capacity.
2. The improvement of the working environment and work to become conducive to health and safety.
3. The development of the work organisations and working cultures in a direction which supports health and safety at work and in doing so also promotes a positive social climate, smooth operation and enhances productivity.

Ultimately, it is of the utmost importance that all Interface staff, employees and sub contractors understand and adopt the principle that nothing that is carried out on any site is worth risking the health and well being of any individual employed or visiting that site. The Health and Safety of everyone is and must continue to be of the highest possible priority.
